LOOK INSIDE THE WALLS OF SAFER BUILDINGS IN CANADA

THE MISSION

100% **CANADIAN** Passive Fire Protection

33.3% Structural Fire-Resistance

33.3% Effective Compartmentation

33.3% Integration of PFP

INSIDE THE NETWORK

PFPCON brings together the professionals who influence how buildings are Designed, Installed, Inspected, and Maintained across Canada, including Contractors, Inspection Agencies, Code Officials and AHJs, Architects, Specifiers, Fire Marshals, and solution providers.

To strengthen education and alignment across the industry, complimentary registration is available for key stakeholder groups, including code officials, architects, specifiers, and select authorities, making participation accessible and impactful.

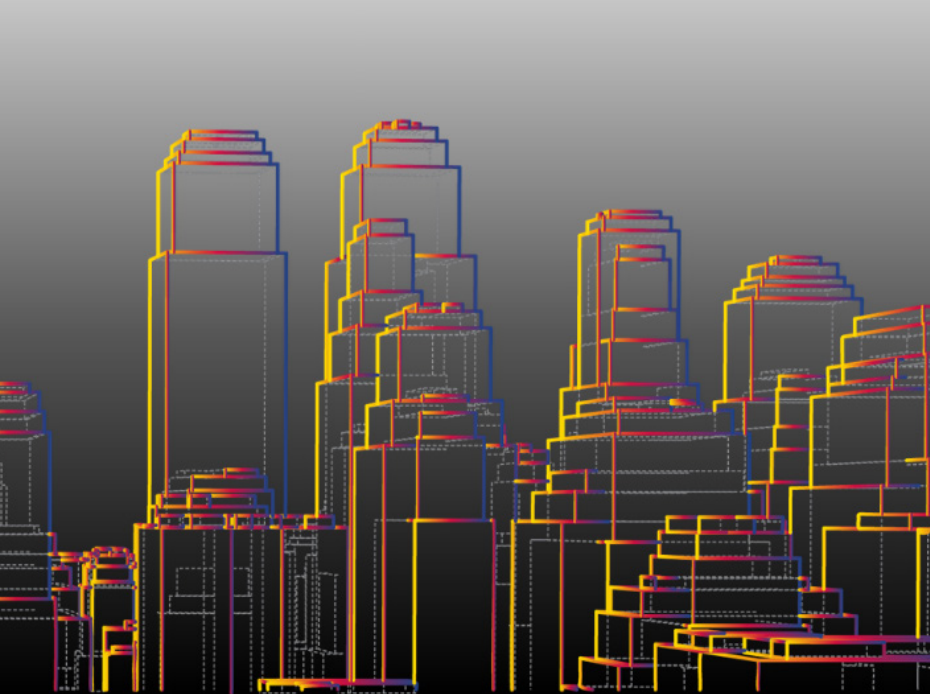

PFPCON Canada is where the most important Passive Fire Protection conversations in Canada are happening.

When attendees step onto the floor, they're not browsing. They're not silently observing. They're learning, evaluating, making informed decisions, and taking everything with them into a safer tomorrow.

INSIDE THE EXPERIENCE

Change in fire protection starts with understanding. PFPCON is built around high-level, practical education and awareness, designed to reach every stakeholder who touches the built environment - from design and specification to construction, inspection, and enforcement.

- **Learn** how Passive Fire Protection supports life safety and property protection under the National Building Code of Canada.
- **Explore** the role that informed Design, proper Installation, thorough Inspection, and regular Maintenance of Passive Fire Protection systems contribute to safer, more resilient buildings.
- **Hear** from Canadian and international experts shaping fire and life safety practices on how compartmentation, structural fire-resistance, and continuity of systems work together inside the walls.
- **Build** connections across disciplines to strengthen accountability and collaboration.
- **Unlock** actionable insights you can immediately implement inside the "walls" of every project you touch.

Where Passive Fire Protection shapes the future of Canada's built environment.

PFPCON '26 Canada, the Canadian Passive Fire Protection Conference & Expo, is Canada's only national event dedicated entirely to Passive Fire Protection (PFP) - the systems and strategies that quietly safeguard lives, property, and continuity when fire and smoke strike.

This is where education ignites awareness - and awareness becomes ACTION.

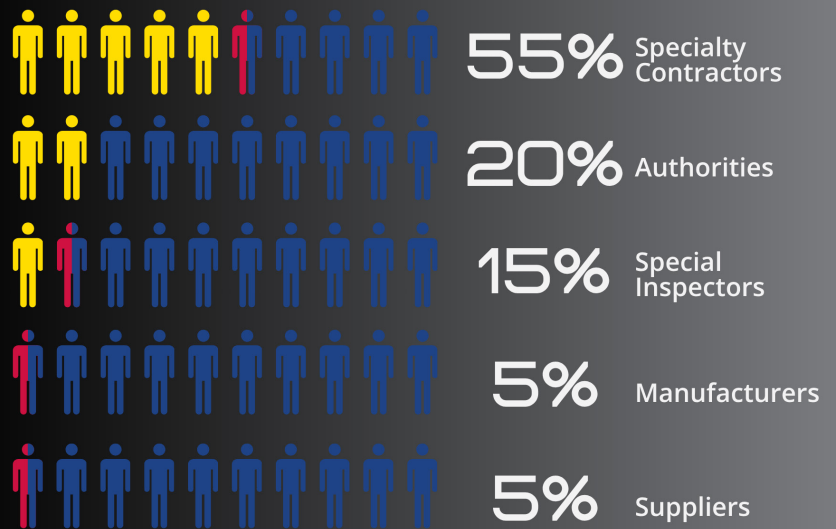

Step inside—and help lay the foundation for a safer Canada.

INSIDE THE ACTION

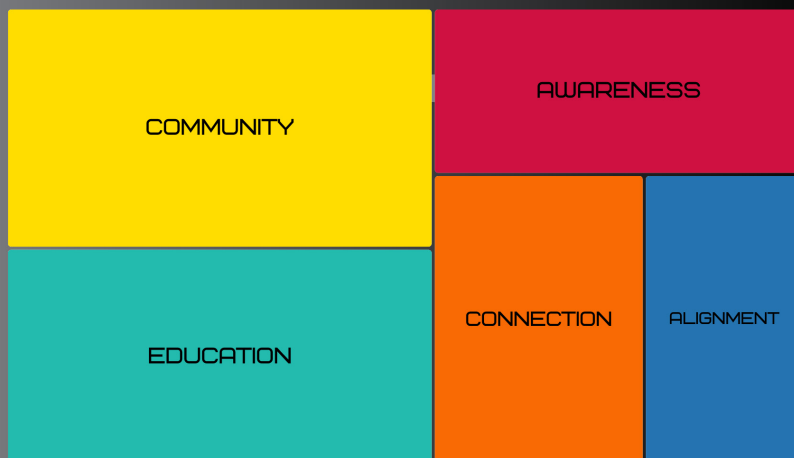

The PFPCON Expo connects education with application.

- **Connect** your brand with education, integrity, and accountability to Canada's most influential decision-makers.
- **Spark** engagements with professionals responsible for specifying, installing, inspecting, approving, and maintaining PFP systems in Canadian buildings.
- **Reinforce** your company's role as a leader in advancing Passive Fire Protection and safer buildings through code compliance, quality, and fire and life safety.
- **Support** the foundation of safer buildings through proper Passive Fire Protection with professionals responsible for specifying, installing, inspecting, approving, and maintaining PFP systems in Canadian buildings.

THE MINDS INSIDE THE MOVEMENT

THE IMPACT

INSIDE THE IMPACT

Sponsoring PFPCON '26 Halifax positions your organization at the forefront of Canada's Passive Fire Protection movement.

Sponsors help fuel:

- National **Education & Awareness** efforts.
- Stronger **Alignment** between design, construction, inspection, and enforcement.
- A growing **Community** committed to improving fire and smoke event outcomes.
