

Barrier Management Symposium™

Fire-Rated Glazing Protective - Resistive

Bill McHugh, FCIA &
Rich Walke, UL, LLC

Presentation Outline - Fire Rated Glazing

- Code Info
- Testing
- Fire Protective & Fire Resistive Glazing
- Labeling – Labeling for Fire-Rated Glass
- Non-Code Compliant Products

Fire-Rated Glazing Suitability for Use Determined by...

Test Standard UL 9, UL 263

- Fire Protective – UL 9
- Fire Resistive – UL 263
- Fire-rated glazing for door and window assemblies – UL 10B, UL 10C
- Ratings –
 - Time, remain in place, stop the spread of fire
 - Hose Stream Test
 - Impact for Safety

Two Key Purposes of Fire-Rated Glass

- Allows visibility into a space
- Prevents fire from spreading
- Compartmentation

Key Testing Components for Fire and Human Impact Safety

Fire Test - Measures the amount of time, in minutes or hours, that fire rated glazing and framing can withstand fire exposure in a furnace.

Hose Stream Test - Heated glass and frames are subjected to water from a fire hose. The cooling, impact and erosion created by the hose stream tests the integrity of the glass and frames and eliminates inadequate materials.

Impact Safety Test - Measures the ability of glass to withstand impact. Ratings are given in levels based on the amount of force the glass can resist. Typically defined by CPSC Category 1 or 2 rating.

Safety Glazing Classifications...in addition to Fire Restance

CPSC 16 CFR 1201 (Category II)

- 400 ft. lbs. pressure
- Tempered Glass, typical laminated glass, filmed glass

CPSC 16 CFR 1201 (Category I)

- 150 ft. lbs. pressure
- Permitted up to 1,296 in²

ANSI Z97.1 (Traditional Wired Glass Only – Removed, IBC 2009)

- 100 ft. lbs. Pressure
- Permitted up to 1,296 in²

Impact Safety Test

TGP Slide, Image

FIRE PROTECTIVE

- Fire Rated, Thin Glazing
- Traditional fire-rated material (wired glass, glass ceramic, hollow metal steel frames, etc.)
 - No Human Impact - Wired
- Used as Opening Protectives
 - Fire Windows: 45-90 Minutes
 - Fire Doors: 20 minutes – 3 hrs
 - May not exceed 25% of the area of a Fire Resistance Rated Wall
 - May not exceed 156ft²
- May not exceed manufacturers tested sizes
- Frames must be Listed

FIRE RESISTIVE

- Stop fire **AND** radiant heat
- Both glass and frames
- “Thick” glazing
- Classified as a “wall” rather than an opening (window)
- Both glass and frames must block passage of radiant heat
- Classified as Wall Construction, and may be used in multi story spans or floor to ceiling sizes

Why is Fire-Rated Glazing Labeled?

- Code Required Since – 2006
- Easy inspection
- Product verification in Building for All...

Label Standards

- “W” indicates that the glass passes ASTM E119
 - This is the wall standard which includes temperature rise and hose stream

- “D” indicates that the glass passed NFPA 252
 - Door standard

- “O” indicates that the glass passed NFPA 257
 - Opening standard

**TABLE 716.3
MARKING FIRE-RATED GLAZING ASSEMBLIES**

FIRE TEST STANDARD	MARKING	DEFINITION OF MARKING
ASTM E 119 or UL 263	W	Meets wall assembly criteria.
NFPA 257 or UL 9	OH	Meets fire window assembly criteria including the hose stream test.
NFPA 252 or UL 10B or UL 10C	D	Meets fire door assembly criteria.
	H	Meets fire door assembly “Hose Stream” test.
	T	Meets 450°F temperature rise criteria for 30 minutes
	XXX	The time in minutes of the fire resistance or fire protection rating of the glazing assembly

For SI: °C = [(°F) - 32]/1.8.

Fire-Rated Glass Manufacturer Label

FireLite®

**D-H-20
OH-20**

2" wide x .75" tall

Fire-Rated Frame Manufacturer Label

Fireframes® Heat Barrier Series S
by TGP

SPECIAL PURPOSE FIRE DOOR FRAME ASSEMBLY
FIRE RATING 60 MIN. SERIAL NO _____
TEMPERATURE RISE, 30 MIN. 250° MAX
POSITIVE PRESSURE
ALSO CLASSIFIED IN ACCORDANCE WITH UL-10C

Installers should not remove or paint over frame labels

Fireframes® Designer Series S
by TGP

SPECIAL PURPOSE FIRE DOOR & WINDOW FRAME ASSEMBLIES
FIRE RATING 60 MIN. SERIAL NO _____
POSITIVE PRESSURE
ALSO CLASSIFIED IN ACCORDANCE WITH UL-10C

BEGIN A BASIC SEARCH

To begin a search, please enter one or more search criteria in the parameters below.

Company Name (options)	<input type="text"/>
City	<input type="text"/>
US State	Select a state <input type="text"/>
US Zip Code	<input type="text"/>
Country	Select a country <input type="text"/>
Region	Select a region <input type="text"/>
Postal Code (non-US)	<input type="text"/>
UL Category Code (options)	<input type="text"/>
UL File Number (help)	r13377 
Keyword	<input type="text"/>
<input type="button" value="SEARCH"/> <input type="button" value="CLEAR"/>	

TIPS FOR EFFECTIVE SEARCHES

Select a search method

- Match all words - type AND between words (i.e., display **and** nwgq)
- Match any word - type OR between words (i.e., hair dryer **or** blow dryer)
- Match phrase(s) - type exact phrase

ABOUT THE ONLINE CERTIFICATIONS DIRECTORY

You can use the UL Online Certification Directory to:

- Verify a UL Listing, Classification, or Recognition
- Verify a UL Listed product use
- Verify a UL Recognized component use
- Verify a product safety standard

Installation of Fire-rated assemblies

- Framing similar to typical storefront systems
- Any qualified glazing sub contractor can install
- Must follow UL Listing and manufacturer's installation guidelines

Questions:

- What is the required fire-rating for the application?
 - Fire Resistance?
 - Fire Protection?
- Does the glazing system need to block the transfer of radiant heat?
- Does the glazing meet impact safety standards?
- Should I select performance films or laminates?
 - Factory? Field?
- Are there any acoustic or thermal performance needs?
- Is the glazing being installed into the proper framing assembly (Rated?)
- Once the glazing has been selected, did you confirm the material has been tested by a testing agency such as UL and can be validated through that testing agency?
- **How does the frame attach to the wall? Door? Transom?**

Case Studies

Project: University Hospitals, Seidman Cancer Center

Location: Cleveland, OH

Architect: Cannon Design

Products: Fireframes® Designer Series steel doors and frames with FireLite Plus® glass ceramic
