

FCIA FIRESTOP MANUAL OF PRACTICE (MOP) 8TH EDITION

FCIA MATERIALS & SYSTEMS GUIDE MANUAL 3RD EDITION

The Firestop Contractors International Association (FCIA) is a worldwide professional trade association of Specialty Firestop Installation Contractors, Special Inspection Agencies, Consultants, Manufacturers, Distributors, and more dedicated to the 'D'esign selection/analysis, 'I'nstallation, 'I'nsp'ection, and 'M'aintenance of protection of life safety firestop systems.

One of FCIA's core missions is building knowledge and awareness of the importance of life safety firestop systems and effective compartmentation.

In an effort to see the reliability of installed fire and life safety systems in buildings around the globe improve, FCIA developed a series of resource guides for the industry. These guides elevate the knowledge and quality of workmanship of Firestop Containment Workers and Special Inspectors, and also impart the requisite knowledge to Authorities Having Jurisdiction (AHJ's) who issue building permits and approvals. Additionally, Specialty Firestop Installation Contractors pursuing FM 4991 Approval or UL-ULC Qualification, Special Inspection Agencies seeking IAS AC 291 Accreditation and their personnel seeking approval as a Special Inspector, and the Firestop Containment Worker ALL need to understand industry protocols for firestopping and effective compartmentation reliability.

These documents are available for purchase from FCIA for use by ALL individuals involved in every aspect of fire and life safety systems in buildings.

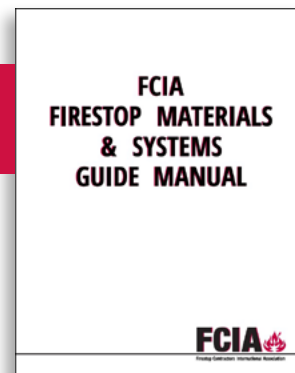

The FCIA Firestop Manual of Practice - 8th Edition (MOP)

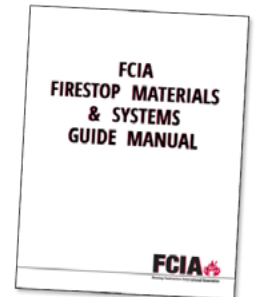

This is the firestop industry's handbook of accepted firestop knowledge. It is used by contractors, inspectors, architects, engineers, manufacturers, building officials, fire marshals, and more around the world to learn about the trade and to use as a reference guide. The MOP is also used as a reference document for the FM & UL-ULC Firestop Exams for those seeking accreditation through the FM 4991, Standard for the Approval of Firestop Contractors and the UL/ULC Qualified Firestop Contractor Programs. The FM & UL/ULC Firestop Exams are also used for Special Inspection Agency personnel at companies who become IAS AC 291 Accredited.

FCIA Materials & Systems Guide Manual - Firestop Containment Worker Edition, 3rd Edition

This is the firestop industry's knowledge handbook for Firestop Containment Workers. This manual is a support document for the FCIA Firestop Certificate of Achievement Education Program (FCAEP). Learn about firestop testing standards, history, materials, tested and listed systems, and systems selection and analysis that the firestop field worker and all others in the industry MUST know.
