Mark Dietz
Superl, Inc.
7301 Apollo Court, Lino Lakes, MN 55014
Phone: (763) 571-7464 ~ Email: mark@superl.net

Mark Dietz holds an Associate of Arts, Architectural Drafting and Estimating, from Dunwoody Institute, Minneapolis, Minnesota having graduated in November, 1991. Since 2007, Mark has been the President/Owner of Superl, and had been Vice Present from 1997-2007, and before that, Project Manager from 1991-2007.

His experience at Superl includes firestopping for commercial, industrial, healthcare and educational facilities. Superl is an FM 4991 Approved Contractor, UL Qualified Firestop Contractor and a Specialty Firestop Contractor for multiple manufacturers. They have worked with Thermafiber in developing numerous tested curtain wall fire containment systems. Superl has been a leader in the curtain wall and firestopping industry for over 35 years. Superl has worked on projects in 38 states as well as Asia, from small specialty projects to high rise structures.

Superl is a FCIA Charter Member, joining in 1999. Mark has been involved with the FCIA Board of Directors for the past 6 years, as President in 2017, Vice—President in 2016 and as Treasurer in 2014, 2015 & 2018. He is currently serving as the Treasurer for 2019 and sits on the Code and Marketing Committees and is Chair of the Membership committee.

Mark has been married to Jennifer for 33 years and they have two sons, Parker, 24, and Tanner, 21. He enjoys fishing and traveling with his family. He has coached his sons' basketball teams for ten years.
Alan Mcdurmon
Performance Contracting, Inc.
140 Etowah Trace, Fayetteville, GA 30214
Phone: (678) 817-5400~ Email: alan.mcdurmon@pcg.com

Alan Mcdurmon is a Senior Estimator of Performance Contracting, Inc. in Atlanta, GA, an FM-4991 Qualified Firestop Contractor and serves as the DRI. He is responsible for customer relations, acquiring bid opportunities, estimating/establishing production rates, project manager, quality assurance/safety management, obtaining engineering judgments when necessary and education and training of employees.

Prior to Alan’s employment at PCI Atlanta, the branch was solely focused on mechanical insulation. Along with developing a customer base, Alan has developed production rates, educated fire marshals, architects and others in the construction industry of the need for this scope of work to be performed correctly by Specialty Firestop Contractors. PCI is heavily involved in firestop across the country including nuclear, industrial and commercial construction.

Alan has worked in firestopping for the past 18 years in the southeast United States and has had the opportunity to be trained by several of the founding members of the FCIA organization. Firestopping has been his primary focus for all these years and along with others in the area, has seen it become a ‘trade’ within our region instead of just an after-thought.

Alan is a long time FCIA member and has served on the FCIA Marketing Committee for 3 years, furthering firestop within other organizations to improve the construction industry’s view of life safety with regards to firestopping. Being passionate about firestopping, he would like to assist in helping steer the industry in the right direction, continuing to work the path across the country to push for single source installers while growing the education of the AHJ’s to insure proper firestop installs are done by all.

Alan has firestop product manufacturer’s certificates of completion for educational and training classes from Hilti, 3M and STI.

Alan has been married to Kimberly for twenty five years and they have three children, Reilly, 21, Avery, 17 and Ivey, 7. He enjoys watching his son play football as a senior in high school, seeing his daughters compete in the pageant world, shooting firearms, working on his parents farm and other fun outdoor activities.
David's work career started in the residential industry as a home builder in Kentucky. Since then his career has taken him to California, Indiana, Oklahoma and Texas. 21 of those years were spent with Hilti. While there, 9+ years were in the Firestop Industry as a Fire Protection Specialist and Firestop Product Manager.

In addition to product development and marketing, his various roles at Hilti allowed him to work closely with the inspection and architectural communities throughout Indiana, Illinois and Texas. His focus was on educating the AHJs, promoting use of firestop systems, and promoting use of professional installers. David gained a strong insight into the codes and standards that influence and drive the firestop industry through this experience.

As Product Manager he was responsible for development, testing and marketing of Firestop products. In that role he gained experience with 3rd party testing companies such as Underwriter’s Laboratory, Factory Mutual and Intertek. His efforts brought FS One, Fire Block and Plug from formula through testing and ultimately published UL Systems. CP 606, CP 643 and CP 601S were other products that David was engaged in directing product development before moving to the Contractor segment of our industry.

Currently as Director of the Firestop Division for Alpha Insulation & Waterproofing he is based in the Dallas/Ft. Worth office. His duties include developing and steering Alpha’s Firestop objectives on a daily and annual basis. In addition, he is the DRI for their Dallas/Ft. Worth branch. David works with each Alpha office to pursue firestop professional installer opportunities and to promote their firestop division to construction managers/general contractors and MEP trades. During his tenure Alpha’s firestop business has obtained double digit growth annually. Improvements in the quality of their work has been elevated through on-going training and development of their estimating/sales staff and more importantly through their field superintendents and firestop technicians. Alpha has 1 location FM 4991 Approved and 5 locations now as a UL Qualified Contractor.

David has been a FCIA member for 9+ years. Over the past four years he has been actively involved on the Program Committee. In the past year David has joined the Lafe Safety Digest and Education Committees. Now he would like your support by electing him to the Board where he can continue to serve the association, its’ members and the industry.

David is married and has one son. Monique, his wife of 33 years, teaches elementary school. They live in a suburb of Ft. Worth, Texas. Their son Bryant recently located to Denver Colorado and is starting a career in the construction industry.
