Barrier Management Symposium
ASHE, The Joint Commission

ASHE Region 6
Kahler Hotel
2015 April 14 & 15
Barrier Management Symposium

• Speakers – Tuesday & Wednesday
  – Jonathan Flannery, ASHE Advocacy
  – Anne Guglielmo, The Joint Commission
  – Rich Walke, UL
  – Bill Koffel, Koffel Associates
  – Nestor Sanchez, USG Corp.
  – Rich Walke, UL - Concrete Industry
  – Bill McHugh, FCIA – Firestopping
  – Paul Baillargeon, DHI – Fire Doors
  – Marc Sorge, Greenheck – Fire&Smoke Dampers
  – Tim Warren, TGP – Fire Rated Glazing
Details

• Objective – YOU
• Thanks for Attending…
• Speakers Volunteer…
Objective – Share Knowledge

• Barriers are for Safety – DIIM
  • Properly *Designed* and Specified
    – *Tested and Listed Systems* – Directories, Tables
    – *Specified*
  • Professional *Installation* Companies
  • Properly *Inspected* – Commissioned, by Companies
  • *Maintained* –
    – NFPA 101 - 2000 (TJC, CMS)
    – International Fire Code - IFC 2012 - Annually (Local)

• **Effective Compartmentation for Fire & Life Safety**
“TOTAL FIRE PROTECTION”

• Effective Compartmentation
  – Fire Barriers, Fire Walls/Floors, Smoke Barriers
  – Firestopping, Fire Dampers, Swinging and Rolling Fire Doors, Fire Rated Glazing

• Detection & Alarm Systems

• Sprinkler Suppression Systems

• Education & Egress
  – Building Owners & Managers, Building Occupants and Firefighters

ATTENTION: PRIOR TO WORKING CUTTING INTO THIS WALL CONTACT THE BUILDING REPRESENTATIVE

2 HR RATED
FIRE/SMOKE WALL
PROTECT ALL OPENINGS AND PENETRATIONS
Building & Fire Code Requirements

• *Continuous Fire Resistance*
  – Walls / Horizontal Assemblies – Continuity
    • Firestop Products Become Firestop Systems
      – Penetrations
      – Joints – Head / Bottom of Wall – Perimeter Joints
    • Fire & Smoke Damper Duct Systems
    • Fire Doors and Hardware Systems
      – Rolling & Swinging
    • Fire Rated Glazing
Continuity
Effective Compartmentation Features

New UL test standards for Life Safety Dampers will take effect in July 2002
Barrier Continuity SYSTEMS

• Products Become Systems Through Testing
  – Fire & Smoke Barriers - ASTM E 119, UL 263
  – Firestopping - ASTM E 814 / UL 1479, ULC-S-115, UL 2079, E-2307 as the test method…”
  – F/S Dampers - UL 555, UL 555S
  – Swing/Rolling Fire Doors - UL 10B, 10C
  – Fire Rated Glazing - UL 9

• SYSTEM Testing = Suitability statement for use of a product in a specific system application
Products become Systems
Hose Stream = Shock Test
Barrier Continuity
Products become SYSTEMS

- Fire Rated Systems Directories –
  - UL Fire Resistance Directory
  - Intertek
  - FM Approvals

*Systems Selection & Analysis...Not as easy as it looks...*
Barrier Continuity
I – Installation – Listed Systems
I- Installation
Who’s Responsible, How to Choose???
What Contractor Qualifications?

• FM 4991 – Standard for the Approval of Firestop Contractors
• UL Qualified Firestop Contractors
• Other Industries…
  – FM 4991/UL CONTRACTORS UNDERSTAND SYSTEMS & DOCUMENTATION
Why Contractor Qualifications?

• Accountability
• Built right the first time…
• Documentation
• SYSTEMS Selection, Analysis, As-Builts
  – F, T, L, W Rated Systems
  – Tolerances - Annular Space Sizes, Angles
  – Gap Sizes - Undercuts - Framing
  – Anchors - Spacing – Hardware
  – Closers - Activation Sensors, more…
I – Inspection – Options

• Contractor Self Inspection
  – Verify Management System validity

• Manufacturer Inspection?
  – Does not exist … Survey, maybe

• Special Inspection/Commissioning
  – Independent 3rd Party
  – Destructive, Non Destructive
  – Specified Frequency
  – Inspection Agency Accreditation – IAS AC 291
Compartmentation for Safety
M – Maintenance (& Management)
Firestop Maintenance

• **Maintenance**
  – Code Required
  – How??

• **How to keep Track – Barrier Management Initiative**
  – Paper
  – Software
  – Labeling
SECTION 4.5.8 Maintenance, Inspection, and Testing.

4.5.8.1 Whenever or wherever any device, equipment, system, condition, arrangement, level of protection, fire-resistive construction, or any other feature is required for compliance with the provisions of this Code, such device, equipment, system, condition, arrangement, level of protection, fire-resistive construction, or other feature shall thereafter be continuously maintained in accordance with applicable NFPA requirements or requirements developed as part of a performance-based design, or as directed by the AHJ. [101:4.6.12.1]
4.5.8.2  No existing life safety feature shall be removed or reduced where such feature is a requirement for new construction. [101:4.6.12.2]

4.5.8.3*  Existing life safety features obvious to the public, if not required by the Code, shall be either maintained or removed. [101:4.6.12.3]

4.5.8.4  Any device, equipment, system, condition, arrangement, level of protection, fire-resistive construction, or any other feature requiring periodic testing, inspection, or operation to ensure its maintenance shall be tested, inspected, or operated as specified elsewhere in this Code or as directed by the AHJ. [101:4.6.12.4]

4.5.8.5  Maintenance, inspection, and testing shall be performed under the supervision of a responsible person who shall ensure that testing, inspection, and maintenance are made at specified intervals in accordance with applicable NFPA standards or as directed by the AHJ. [101:4.6.12.5]
703.1 Maintenance. The required fire resistance rating of fire-resistance rated construction (including walls, fire stops, shaft enclosures, partitions, smoke barriers, floors, fire resistive coatings and sprayed fire resistant materials applied to structural members and fire resistive joint systems) **shall be maintained**. Such elements shall be **visually inspected by the owner annually** and properly repaired, restored or replaced when damaged, altered, breached or penetrated.

**Openings** made therein for the passage of pipes, electrical conduit, wires, ducts, air transfer openings, and **holes** made for any reason **shall be protected with approved methods** capable of resisting the passage of smoke and fire.
Chapter 1, SECTION 21
Firestopping

21.15.2 The required fire resistance rating of installed firestop systems shall be visually inspected by the owner or owner’s inspection agency annually. Damaged, altered or breached firestop systems shall be properly repaired, restored or replaced to comply with applicable codes as per the guidelines of Civil defense.

21.15.3 Any new Openings made therein for the passage of through penetrants, shall be protected with approved firestop system to comply with applicable codes as per the guidelines of Civil defense.
Division B – Part 2, Building and Occupant Fire Safety

2.2.1.2 – Damage to Fire Separations – where fire separations are damaged so as to affect their integrity, they shall be repaired so that the integrity of the fire separation is maintained…

FCIA Manual of Practice – Appendix, Maintenance
FCIA recommends Barrier Management for Effective Compartmentation and Structural Protection
M–Barrier Management Systems

‘When you’re up to you’re a__ in alligators, it’s hard to remember you’re there to drain the swamp.’
Barrier Management Begins when new construction ends...

Barrier Management
Policy Tool

• Pre Construction Meetings - Education
  – Barrier Markings Mean…
  – Actions when at Barriers Required...
    • Permit required – Above Ceiling, Barrier Hole…
    • Infection Control Rules
    • Healthcare facility Rules
Barrier Management Policy Tool
– Barrier Warnings on ASSEMBLIES
Barrier Management
Policy = Tool

703.7 Marking and identification. *Fire walls, fire barriers, fire partitions, smoke barriers and smoke partitions or any* other wall required to have protected openings or penetrations shall be effectively and permanently identified with signs or stenciling. Such identification shall:

1. Be located in accessible concealed floor, floor-ceiling or *attic spaces*;
2. Be located within 15 feet (4572 mm) of the end of each wall and at intervals not exceeding 30 feet (9144 mm) measured horizontally along the wall or partition; and
3. Include lettering *not less than 3 inches (76 mm) in height with a minimum 3/8 inch (9.5 mm) stroke* in a contrasting color incorporating the suggested wording.

“FIRE AND/OR SMOKE BARRIER—PROTECT ALL OPENINGS”
or other wording.

Exception: Walls in Group R-2 occupancies that do not have a removable decorative ceiling allowing access to the concealed space.
Barrier Management
Policy = Tool
Barrier Management Policy Tool

• Violation Consequences
  – In House –
    • 2 strikes & work reassignment to cleaning…
    • Others…
  – Outside Contractors
    • 2 strikes & not allowed to work above ceilings
    • Others…
Barrier Management
Policy Tool

• Incentives
  – Find Violators….
    • Staff Awards
